Capabilities of Xemplar Exi

Customer Self-Service

Using APIs of the core systems (such as Policy Admin, CRM, ERP, etc.), Exi can extract data and compose user-friendly responses to handle customer queries and transactions.

Knowledge Base

Respond to customer queries related to your products & services, with precision and expertise using generative AI.

GPT-Powered Intelligence

Leverage the latest in AI technology for natural and context-aware conversations.

API-Driven Architecture

Seamlessly integrate with core systems, ensuring a cohesive user experience.

White-Label Flexibility

Customize Xemplar Exi to align with your brand identity and messaging.

TAILORED FOR YOU

An **Admin Portal** to monitor all chat conversations, adoption trends, top features, etc. including the ability to obtain insights on types of questions users are asking. A convenient way to access and improve chatbot's performance and quality of responses.
